LEGEND

1. The numbered areas represent several gravesites (casket and ash burials).
2. Graves located in aisles are referred to a nearby numbered space.

Example:

Brenda Peebles (1951) — Keith Cox (2009)
Radford Peebles (1980) — Edna Cox (1981)
 — Robert Cox (1986)

All five names appear in the cemetery directory with the number 140 following each name

HOW TO FIND A PARTICULAR GRAVESITE

1. Find name in cemetery directory
2. The number beside the name will give the map location

CREDITS

- This cemetery directory project was funded by Manitoba Culture, Heritage and Tourism
- The final form of the maps and directory list was prepared by ATLAS Geomatics

The figure shows two cemetery maps. The West Cemetery is divided into North and South Drive sections, with graves numbered 1 through 191. It includes a church sign, electrical panel, and parking lot. The East Cemetery is divided into North Strip and South Strip sections, with graves numbered 1 through 181. It includes a church, columbarium, cemetery directory, cairn, and hall. Both maps feature a legend explaining how to find gravesites using numbers from the cemetery directory. A north arrow points towards the top right of the page.

2. The number beside the name will give the map location

CREDITS

- This cemetery directory project was funded by Manitoba Culture, Heritage and Tourism
- The final form of the maps and directory list was prepared by ATLAS Geomatics

The figure shows two cemetery maps. The West Cemetery is divided into North and South Drive sections, with graves numbered 1 through 191. The East Cemetery has a North Strip section with graves 1 through 14, followed by a larger area with graves 15 through 181. Various landmarks like the Church, Hall, Parking Lot, and Electrical Panel are marked. A legend explains how to find gravesites using numbers from the cemetery directory, with an example showing names and their corresponding plot numbers (e.g., 140).
